## DATA ANALYSIS

### Key insights:

- Industry Major Players - BV (Buena Vista Productions)
- The movie industry continues to grow steadily and provides higher profits and investment returns every year (except 2020) reaching \$30b gross profit in 2019.
- Mean worldwide return of investment has been oscillating between 3 and 4 ratio while domestic ROI has been close to 2.
- The most popular and highest rated genres are documentary, biography, history and war genres. However some supernatural movies show quite robust profits and return.

### Key recommendations:

- In terms of the highest return of investment the **best production budget size is up to \$100M**. Movies with higher budgets never exceed the ROI ratio of 10. The recommendation is to split funds into few smaller budget movies rather than one expensive.
- In terms of the genres the recommendation is to choose the highest rated **genres** in the following order: **documentary, biography, history but also supernatural horrors**
- Even though the horror movie is the lowest rated genre, given a combination of a small production budget and good idea, this type can achieve significant ROIs.
- For any potential **cooperation with any production studios the best choice is BV**.
- The best examples of **the most profitable movies are: horrors like "Paranormal Activity" or "The Gallows" and documentary "Super Size Me"**
